MEMORANDUM FOR: Deputy Director for Science & Technology
Deputy Director for Operations

FROM: Director of Central Intelligence

SUBJECT: Defense Science Board

1. After my talk to the Defense Science Board on Wednesday night, Dr. Fubini and Dr. Herzfeld asked if we would like help in three directions: advice on technical systems that might aid human intelligence-gathering; aid in our anti-terrorism activities or in counterintelligence. What they offered to do is have a small panel from the Defense Science Board work with us. They don't know enough about our requirements to know how they might help.

2. I'd appreciate your views.
